

LAMAX X9.1 Firmware installation guide

1. Unzip the installation package.
2. Open the folder, you should see nine files in total.
3. Copy all of the 9 files to your empty SD card.
4. Shut down the cam and connect it to the power supply. (To prevent the battery to run out)
5. Insert the SD card to the camera, turn the camera on and the FW will start updating by itself.
6. Wait for 3min until the firmware is updated completely.
7. Format the SD card.
8. The installation process is now complete.
